RetinolEyes Eye Cream

RECOMMENDED SKIN TYPES

INGREDIENT HIGHLIGHTS

- Hydroxypinacolone Retinoate, Tocopheryl Acetate (Vitamin E), Phytonadione (Vitamin K), Palmitoyl Tripeptide-1, Palmitoyl Tetrapeptide-7

DESCRIPTION

A rich and restorative, all-in-one, anti-aging eye cream contains peptide complexes, a breakthrough Retinoid, and a form of Vitamin K, to reduce dark circles, promote collagen production to improve fine lines and wrinkles, and increase cellular turnover resulting in healthy, younger-looking skin in this delicate area.

BENEFITS

- Contains a breakthrough Retinoid to increase cellular turnover
- Contains multiple peptide complexes to aid in the production of collagen resulting in more youthful skin
- Firms, tightens and brightens aging skin
- All-in-one eye cream that effectively combats signs of aging

DIRECTIONS FOR USE

- Apply small amount to eye area, gently patting skin with ring finger. Can be used twice daily or as directed by physician. Use sunscreen daily as an increase in sun sensitivity associated with the use of Retinol.

INGREDIENTS

- Water/Aqua/Eau, Glycerin, Dimethicone, Helianthus Annuus (Sunflower) Seed Oil, Isopropyl Palmitate, Dimethyl Isosorbide, Glycol Distearate, Stearic Acid, Stearyl Alcohol, Vitis Vinifera (Grape) Seed Oil, Persea Gratissima (Avocado) Oil, Allantoin, Phenoxyethanol, Glyceryl Stearate, PEG-100 Stearate, Butylene Glycol, Carbomer, Hydroxypinacolone Retinoate, Titanium Dioxide, Tocopheryl Acetate (Vitamin E), Ethylhexylglycerin, Phytonadione (Vitamin K), Steareth-20, Sodium Hydroxide, Disodium EDTA, Polysorbate 20, N-Hydroxysuccinimide, Palmitoyl Tripeptide-1, Chrysin, Palmitoyl Tetrapeptide-7
