Suzanne R

Dear Dr. Giangrande,

I hope this letter finds you well. I apologize that it took almost a year to write this letter, but I didn't know how to put it all into words. I came into your office 2/17/16 with a raging case of uveitis. You spent hours trying to determine what brought this disease on. You tried to heal me with modern medicine and then after 2 weeks you said, "Are you willing to take a chance?" I was desperate after having compromised vision for weeks and using painful steroid drops. You recommended holistic healing, turmeric with black pepper. Well within a week my vision started to restore itself.

Through our check ups and visits you discovered I suffered my entire life with migraines. I signed up for epigenetic health study and within a month my migraines were almost gone.

How can I thank you for my vision and lack of migraines. My eyesight is perfect and my migraines are gone except for an occasionally one that is usually my fault for breaking the program. Also I was thought to have RA but any signs of that are now gone too!

So I am writing this letter to thank you but also in the hopes that maybe it can be put on the website or posted somewhere for all to see! You are a blessing and I am beyond thankful for all that you have done for me!

Fondly,

Suzanne R.
