Grow Old Gracefully

O need to suffer from poor eyesight as the years A VO need to suiter from poor eyesight as the years advance. Just consult your optometrist when your eyes commence to fail and he will prescribe the correct lenses. If glasses are necessary he will advise you to that effect and thus save you possible years of defective vision, headaches and general discomfort.

There are so many things in this world worth seeing that it is a shame to miss any of them. With properly fitted glasses, as prescribed by your optometrist you may be sure you will enjoy yourself more and take as much interest in your life and your surroundings as a person many years younger. Don't put up with failing vision in life's glorious sunset days.
