

# HOW DOES MIYOSMART WORK?

Cutting edge researches<sup>6-8</sup> showed that myopia progression can be controlled by providing clear vision and constant myopic defocus simultaneously.

## PRINCIPLE OF HOW D.I.M.S. TECHNOLOGY WORKS IN MIYOSMART

\*Illustration is not representational of actual lens shape and design

The D.I.M.S. technology in MiyoSmart was clinically proven to succeed in the control of myopia progression in the majority of children,<sup>3</sup> and in 2018, it went on to be awarded the prestigious Grand Prize, Grand Award and Special Gold Medal at the 46th International Exhibitions of inventions of Geneva, Switzerland.<sup>9</sup>

# WHY MIYOSMART?

**A unique and innovative solution** for controlling myopia

**Clinically proven** effectiveness in slowing down myopia progression<sup>2</sup>

**Child-friendly, easy to adapt** and non-invasive

For more information on **MIYOSMART** lenses, speak to your local eye care professional today.

# WHAT IS MYOPIA?

Nothing is more important than the health and well-being of your child. Now and in the future, you want to see your child thrive. You may have noticed your child struggling to see clearly at a distance, making it harder to concentrate at school and have a fulfilling experience at play. Your child may have myopia, or near-sightedness.

## ILLUSTRATION OF A MYOPIC EYE

The incidence of myopia is expected to increase significantly<sup>1</sup> as lifestyles change, with children taking part in more near-sighted activities<sup>2</sup> like using digital devices, studying and reading, and spending less time outdoors. Hereditary, behavioural and environmental factors also play a part.

Getting your child's myopia diagnosed early not only corrects their vision now, but can help to slow the progression of myopia and preserve their vision and eye health for the future.

**A BREAKTHROUGH IN MYOPIA MANAGEMENT FOR YOUR CHILD**

## SEEING THE FUTURE: MiYOSMART WITH D.I.M.S. TECHNOLOGY

## AN EFFECTIVE SOLUTION FOR MYOPIA MANAGEMENT

An estimated **5 billion** people, or **half of the global population**, could be affected by short-sightedness by **2050**.<sup>1</sup>

Research shows that **more time spent on near-work activities** is associated with a **greater likelihood of myopia**.<sup>2</sup>

## SEEING TO YOUR CHILD'S EYESIGHT

### MiYOSMART

**MiYOSMART** lenses are innovative lenses for myopia control developed by Hoya, together with its research collaborator. Beyond correcting myopic refractive error, a two-year clinical trial shows that MiyoSmart lenses with D.I.M.S. (Defocus Incorporated Multiple Segments) technology work to curb myopia progression. Participants who completed the 2-year trial the wearing MiYOSMART with DIMS Technology had myopia progression reduced by average of 60%.<sup>3</sup>

By slowing down the progression of myopia and its associated eyesight deterioration, your child can enjoy their life more by seeing clearly.

### FEATURES

#### D.I.M.S. TECHNOLOGY

#### EYE SHIELD

### BENEFITS

- A non-invasive solution that corrects short-sightedness while effectively curbing myopia progression
- Safe and effective
- Impact-resistant material safe for active kids
- Provides UV protection

#### Spend Time Outdoors

Research showed that spending time outdoors may reduce the risk of myopia and its progression.<sup>4</sup>

#### Seek Regular Eye Care

Set your child up with regular eye check-ups to ensure that myopia or other vision problems are detected and treated early, reducing the worsening of vision, myopia progression and potential complications of high myopia.

#### Give Eyes a Break

Reduce your child's eye strain by reminding him/her to take breaks from intensive screen time or near-work.<sup>5</sup>
