

August 27, 2020

To Our Patients,

The doctors and staff at South County Eye Care are pleased to announce the addition of Dr. Karen Toki to the practice. Dr. Toki has been practicing in the Irvine area for nearly 20 years and she is excited to bring her passion for patient care to our practice. Dr. Toki is licensed to manage and treat eye conditions such as dry eye, glaucoma and infections. She provides preoperative and postoperative care for cataracts as well as refractive eye surgeries such as LASIK and PRK.

She will be seeing patients on Wednesdays and Fridays which means more availability for your exam needs and shorter waiting times for appointments.

Please see her linked bio on the website and join us in welcoming Dr. Toki to the practice. We are confident she will continue to provide the personalized and professional care that you have become accustomed to here at South County Eye Care.

Sincerely,

Drs. Lucy DeMoss and Justin Michaels
