

Experience nearly natural binocular vision from state-of-the-art contact lenses.

- See better than with a soft multifocal—up close, far away and everywhere in between
- Experience more natural vision as your eyes work together, unlike with monovision, and easily focus back and forth between distances
- Look your best by enjoying freedom from glasses and the comfort and convenience of wearing a contact lens

Is Duette Multifocal right for you?

Take this simple test:

1. Do you need help reading and seeing at different distances?
2. Do you have astigmatism and need help seeing up close?
3. Are you tired of carrying around your glasses?
4. Is it hard to see when you drive at night?
5. Is having the best possible vision a priority for you?

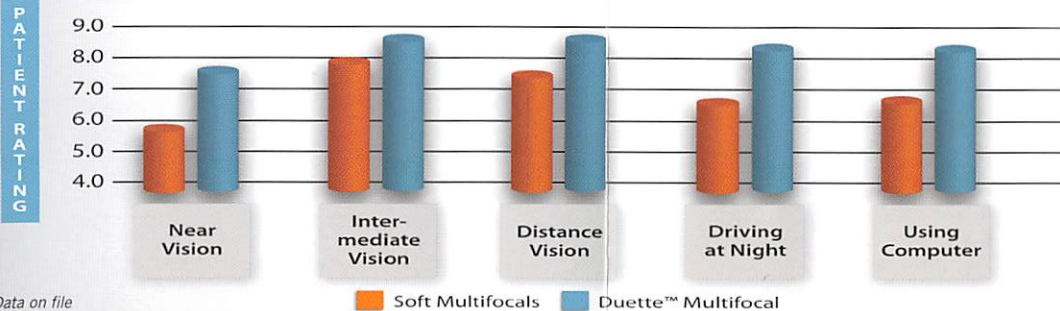

If you answered "yes" to one or more questions, ask your eye care professional about Duette Multifocal contact lenses.
