

# Eyes on Worcester

Our office recently acquired a new and highly sophisticated, computerized instrument enabling us to provide detailed images of the back of your eyes. Fundus photos help assist us in early detection of **Glaucoma, Macular Degeneration, Diabetes and Optic Nerve Diseases.**

We highly recommend that all of our patients receive this test as part of your comprehensive vision analysis. Unfortunately, **routine vision insurance does not cover this procedure.** The fee for this procedure is \$35, to be paid on the day of your visit.

Since our office staff performs this test prior to your exam, please let us know if you would like to have this procedure performed. If you have any questions, the doctor will be more than happy to discuss this in more detail with you.
