MISIGHT CONTACT LENSES

MiSight 1 day contact lenses are a child friendly, daily disposable contact lens proven to slow the progression of myopia (nearsightedness) in children 8-12 years of age at the initiation of treatment. When wearing MiSight 1 day contact lenses, children can experience clear vision, freedom from glasses, and continue to enjoy the activities they love. Dr. Beyer and Dr. Wilkins can help you determine if these contact lenses would benefit your child.

WELCOME Lynn & Elise

Optometric Technicians!

Elise: Elise grew up in southeast Idaho and moved to the Bitterroot Valley in 2002. In her free time, she enjoys reading, watching horror movies, hiking, fishing, and spending time with her boyfriend.

Lynn: Lynn was born in Utah but raised in the Bitterroot Valley. When she's not in the office, she loves spending time outdoors with her family, traveling, and going to the gym.
