Your examination will include a complete medical eye health evaluation, as well as binocular and visual efficiency assessment. Dilation or using drops to open the pupil of the eye may be necessary at the doctor's discretion. The doctors at Domiano Eye Care Centers vision diagnose, manage and treat all aspects of acute or chronic eye diseases, including but not limited to pink eye, glaucoma, macular degeneration, dry eye syndrome and pre-surgical evaluation of cataract and refractive laser surgeries.

Please circle if you would like more information about our services:

Laser Vision Correction (LASIK)

Contact lenses: There are many options for continuous wear up to 1 month, changing eye color, astigmatism and bifocal contact lenses. We also do Special Effects contacts for film and television.

Ortho K Contact Lenses for decreasing myopia without surgery

Sports Vision to enhance your speed of visual reaction time or tracking to improve your game

Low Vision to improve visual impairments due to macular degeneration, diabetic retinopathy, etc.

Vision Therapy to improve visual motor or perceptual skills related to reading and computer

Children: vision problems that interfere with learning or sports; lazy eye, strabismus, amblyopia

Brain Injury: treatment of vision problems such as: loss of side vision, reading or driving problems after stroke, head trauma due to sports or car accident, etc.

Important Note: The Doctor recommends polycarbonate and Trivex (shatter-resistant) lenses to protect your eyes from injury while engaged in any activity where there is a risk of something hitting your eyes. Examples include: Sports, children, construction work, and hobbies such as woodworking

There are additional fees for contact lens evaluations and follow up visits.
