

Hoya Tact Computer Lens

The Hoya Tact Computer lens is primarily designed for computer usage. It promotes good health by limiting the eye fatigue and strain you experience from wearing glasses for a long period of time. The TACT lens also has less distortion than a conventional progressive lens. The Recharge non-glare reduces blue light from back-lit screens such as tablets and other hand held devices. Ask about N2 Eyes Hoya Tact packages that include the frame and lenses!
