THE EXAMINATION

Includes:

- A complete medical case history.
- Retinal photography—photo documentation of the inside of your eyes (when indicated).
- Detection and treatment of eye diseases.
- Advanced diagnostic testing when indicated, for neurological, retinal disease, glaucoma and other eye diseases.
- Refraction — determines your glasses prescription.
- Dry eye and eye allergy evaluation.
- Dilation — drops are used to open your pupil to detect internal eye diseases (when indicated).
- Use of computerized instruments to validate all tests.

Contact Lens Evaluations are not included in the eye health examination. Distinctly separate tests are required for a contact lens evaluation. Additional professional and material fees will be charged for contact lens evaluations.

Please let us know if you are interested in, or wear, contact lenses.

PRESCRIPTION VALIDATION

Contact lens prescriptions are valid for one year. Due to the nature of contact lenses being a prosthetic device on living tissue, as of Jan. 1, 1998, it is a state law that a contact lens prescription will not be released after 12 months, without having an annual eye examination.

INSURANCE

We are in-network providers for many insurance and vision plans. Please let us know if you are a member of a plan. It is important to bring a valid insurance or vision plan card with proof of coverage to your first visit. You will be responsible for all co-pays as well as non-covered services and/or materials on the day of your visit. However, if we cannot obtain an authorization before your services are rendered, you will be required to file your insurance or vision plan privately and you will be responsible for both professional services as well as materials.

Payment for professional services is required at time of visit.

For your convenience we accept:

VISA, MasterCard, Discover, American Express and personal checks with proper identification.

Financing available through CareCredit™

REFUND POLICY

We are not able to provide refunds for professional services rendered or for prescription eyewear. Your eyewear is as unique as a fingerprint.
