

Our Goal Is To Keep Your Eyes Healthy

Early Eye Disease Detection Prevents Blindness

We offer the latest in technology in early eye disease detection

- The screenings are quick (1-2 minutes each), painless and dropless

PHOTOS OF THE BACK OF YOUR EYES **FOR YOUR ADDED PROTECTION, OUR DOCTORS ENCOURAGE ALL PATIENTS TO APPROVE RETINAL PHOTOS**

It's their preferred way to:

- Be sure there are no sight threatening eye diseases while **increasing patient distance** and **decreasing contact**
- Make the exam much **safer for you** and our staff
- Allow for future comparisons of photos and monitor for changes each year
- Reduce the need for dilation (in select cases) **FEE \$25**

I elect to have this screening (**Please circle one – FOR ALL AGES**)

EARLY DETECTION OF GLAUCOMA

GLAUCOMA causes gradual and in most cases painless blindness. It's often referred to as the silent thief of sight. It is the result of damage and thinning of the optic nerve fibers. It can damage your vision so gradually that you wouldn't notice any loss of vision until the disease is at an advanced stage.

With our new Advanced OCT (**O**cular **C**oherence **T**omography) imaging technology we are able to detect glaucoma sooner, thus preventing loss of sight. The nominal fee for this screening is **\$24**.

I elect to have this screening (**Please circle one – for 18+ years old**)

EARLY DETECTION OF MACULAR DEGENERATION

MACULAR DEGENERATION (MD) is a progressive degenerative eye disease of the retina causing permanent loss of central vision. Sadly, by the time patients are diagnosed 78% have already suffered irreversible vision loss, hence the importance of early detection. There are many causes for MD including genetics, poor diet, lack of exercise, smoking and exposure to ultra violet light. Once macular degeneration begins to decrease your best corrected vision it becomes difficult to treat. We recommend this screening for everyone, especially those with a close family member with macular generation, anyone who has ever used tobacco products in the past and people who don't wear sunglasses. The nominal fee for this screening is **\$35**.
