Routine Vision Exam vs. Medical Eye Exam

*For insurance purposes, eye examinations are divided into two categories.
Your eye exam is submitted to your insurance based on what you tell the doctor and based on what the
doctor finds during the examination.*

- Routine Vision Exam:** takes place when you have an eye examination without a medical complaint or systemic problem.

- Medical Eye Exam:** takes place when a patient is being evaluated, followed, or treated for a medical condition or symptoms such as; **diabetes, blurred vision related to a medical condition, dry eyes, allergies, headaches, eye twitching, cataracts, hypertension, glaucoma suspect and many more.**

During your routine vision exam certain medical conditions may be discovered. Your medical benefits will be billed at that time. You are then responsible for any charges that are not covered by your vision care or medical care benefits.

Be sure to check with you insurance carriers if needed for clarification of your benefits, such as eligibility, any co-pays, out-of-pocket-fees and deductibles.

I understand that I will be responsible for any charges not covered by my insurance company
