Type of contact lenses:  Rigid  Soft  Extended Wear  CRT  Other \_\_\_\_\_

Are your contacts comfortable?  Yes  No

Do you have any concerns about your current contacts? \_\_\_\_\_

**Every contact lens wearer should have an annual contact lens exam. During this exam, the doctor will assess the contact lens fit, check parameters and look for any medical issues arising from contact lens wear. A written prescription, good for one year, will be given. If you do not elect to have a contact lens exam, you will not have a current prescription to purchase contacts.**

Do you wish to have a contact lens exam today?

- Yes  No, I do not wish to have a current contact lens prescription

Contact lens patients require additional diagnostic services every year, which are **not included in the annual eye health evaluation**. The additional fee associated with the contact lens fitting is particular to each patient's needs. The fee covers any visits related to contact lens care and any fitting changes for 90 days.

Your eyesight is priceless and we are here to protect it!

Vision threatening diseases such as glaucoma, macular degeneration and diabetic retinopathy often have no outward signs or symptoms in the early stages, so our practice has begun using state-of-the-art technology to assess the health of your eyes.

The iWellness Exam™ is a **quick, non-invasive** scan that allows our doctors to see beneath the surface of your retina. This unique technology can help our doctors detect vision threatening and systemic diseases in their very early stages, when they are most treatable.

As part of your pre-exam testing, our technician will perform the iWellness Exam™ which your doctor will review with you during your examination today. The **\$42 charge** is typically not covered by your vision or medical insurance, so this will be added into the cost of your visit today. Any questions you have about iWellness Exam™ and the results of the test can be discussed with the doctor during your examination.

The iWellness Exam™ provides:

- Detailed SD-OCT scan reports to show a healthy eye or detect early signs of disease.
- Thickness maps of the retina and ganglion cell complex giving your doctor detailed information simply not available with other methods.
- A permanent record for your file, which allows your doctor to compare your iWellness Exam™ scan reports each year to look for changes. For this reason, regular iWellness Exams™ can help your doctor detect common eye diseases such as macular degeneration and glaucoma.
- The retina (located in the back of your eye) is the only place in the body where blood vessels can be seen directly.
- Optomap Retinal imaging- A 200 degree ultrawide view of your retina allows the doctor to detect eye diseases, such as Glaucoma, retinal detachment, Macular Degeneration, eye tumors or eye cancer as well as signs of other diseases, such as stroke, heart disease, hypertension and diabetes, can also be seen in the retina. Early signs can show on your retina long before you notice any changes to your vision or feel pain.
- Under certain circumstances the Doctor may want to dilate and perform the iWellness exam™. A traditional exam with dilation is especially important if you're at high risk of retinal issues.
- In most cases, the Doctor will prefer to do dilation on children 10 and under to get the most accurate prescription.
- Dilation is the alternative to the iWellness exam™ and is covered by insurance. We will instill drops into the eyes and wait 15-20 minutes for them to dilate. Expect blurred vision and light sensitivity to last 3-24 hours.

**We must do one of the following options to check the health of your eye. Please select one:**

**iWellness Exam (\$42)**                      **OR**                       **Dilation**
