

Post Concussion Syndrome

Cutting Edge Functional Approaches to Recovery

You will learn new approaches utilizing physical, psychological and nutritional therapies based on the latest scientific discoveries. You will explore how underlying conditions can make recovery more difficult and how to solve them.

Each panelist will provide clinical pearls to enhance overall post concussion patient care.

Post Concussion Syndrome

Cutting Edge Functional Approaches to Recovery

Meet Your Speakers!

Dr. Matthew Anderson OD, FCOVD, FCCSO
GRAND Developmental Vision Institute
Clinic Director

Post-TBI Visual Disorders & Their Impact on Activities of Daily Living

This presentation will help you gain a better understanding of how traumatic brain injury affects the brain and out vision. You will learn how Dr. Anderson diagnosis and manages visual effects of TBI with the use of lenses, light, and vision therapy. You will also get tools to help you know when post-TBI visual disorders may be impacting your patients.

Dr. Jason Bachewich ND
Nature Doctors
Clinic Owner

Risk Factors and Natural Treatment Options for Concussion and Post Concussive Syndromes

This presentation will discuss how environment toxins/hidden infections and hormone imbalances can increase ones risk of concussions as well as result in long term concussive symptoms. We will discuss testing options and natural treatment strategies to address the underlying imbalances.

Karen Palaniuk MMFT
Brave New Living Psychotherapy
Marriage and Family Therapist

EMDR and Beyond: Integrating Psychotherapy for Comprehensive Post-Concussion Syndrome Healing

This presentation will offer an introduction into psychotherapeutic case conceptualization for effectively treating Post-Concussion Syndrome, along with the exploration of various modalities. A particular focus will be cast on the promising applications of EMDR and it's most recently evolved version, EMDR 2.0.

Dr. Chris Kramp DC
Kramp Chiropractic
Clinic Owner

Chiropractic and Concussion The Importance of the Adjustment

There is no doubt the chiropractic adjustment is beneficial to the nervous system and for initiating healing. In acute and chronic concussion however, there are times when we should not adjust the spine but look to facilitate healing peripherally instead. Dr. Kramp will go over when to refer to a chiropractor. He will also explain when to adjust and when not to adjust, for the chiropractors in the audience, as well as patient recommendations to facilitate optimal healing.
