

River Place Vision Center

We are committed to early detection of eye diseases using the most advance equipment and techniques. For this reason, we strongly recommend that our patients receive the following tests as part of their visual analysis.

Due to the rise of COVID-19 Dr. Smith requests all patients to do the OPTOS retinal exam.

This will reduce the amount of time the patient is in the office by 30-45 minutes and will allow proper social distancing.

The optomap retinal scan allows us to capture images of the back of your eye where potential vision threatening diseases can be found. These include **glaucoma, retinal tears, diabetes, high blood pressure and tumors.**

Optomap= No dilation= No blurred vision or light sensitivity

The fee for this additional testing is \$39

VISUAL FIELD ANALYSIS

Virtually all of the major causes of blindness in the United States can be detected by changes in the visual field. Our computerized technology assists us in the **early detection** of glaucoma, retinal problems, and neurological diseases such as brain tumors, optic nerve diseases and headaches.

Studies have shown this test to be the most accurate screening test for glaucoma.

The fee for this additional testing is \$20

Do you want to have the visual field screening? YES NO

Patient Name (Please Print) _____

Patient (or Guardian) Signature _____ Date _____

I have read and understand this document:

I **decline** to have an internal examination of the eye by optomap or dilation.

Liability Release: I have been informed by River Place Vision Center (Dr. Dennis Smith O.D.) of the importance of retinal evaluation and visual field. I will not hold River Place Vision Center and/ or its staff responsible for any disease or pathology that goes undetected due to the lack of diagnostic information that could have been obtained by these testing procedures.
