OPTOMAP DIGITAL IMAGE OF THE RETINA NOW BEING OFFERED

Drs. Acosta & Atencio highly recommends the Optomap Retinal Screening for all patients yearly. This test can detect retinal problems such as macular degeneration, retinal lesions, glaucoma, retinal holes or detachments, **and systemic diseases** such as diabetes, plaque in arteries and high blood pressure. This test can also **aid in monitoring for changes over time**. A high quality image can be added to your record to ensure any changes in your ocular health are detected as soon as possible.

Drs. Acosta & Atencio believe this test is important and wants everyone to take advantage of this technology. **We are offering this valuable addition to your exam for only \$20.00.** Insurance does not cover this retinal screening.

EARLY DETECTION IS CRUCIAL

_____ I agree, and would like the Optomap images to be taken, reviewed and added to my record.

_____ I am deferring this offer today.
