

### ***Routine VS Medical Exams***

*We are committed to caring for our patient's complete ocular health. You will receive a COMPLETE EYE HEALTH EXAMINATION. The doctor of optometry is trained to diagnose and treat most ocular diseases.*

*As a courtesy to our patients, we are happy to file with your insurance company. NOTE: The patient is responsible for any co-pays, co-insurance and/or deductibles which your insurance requires at the time of appointment.*

ROUTINE VISION EXAM will be filed with a patient's Vision Plan if you have one. A routine exam means there is not a medical diagnosis. Routine diagnosis is myopia (near-sightedness), hyperopia (far-sightedness), astigmatism and presbyopia.

If a MEDICAL DIAGNOSIS (cataracts, glaucoma, macular degeneration, diabetes, foreign body, conjunctivitis - pink eye or allergies, or contact lens complications) is determined by the doctor, the patient's exam is NO longer routine, but medical. This means we will bill your Health (Medical) Insurance. We request a copy of your medical insurance at the time of your appointment for billing purposes.

I have read and understood when my VISION PLAN will be billed and when my MEDICAL INSURANCE will be billed.

Please note: you will be advised by Dr. Galbrecht how your exam will be billed.
